Project Sheet: Shimmering Present

What you need:

- Unmounted Stamp Plate – Bears & Birthday
- Walnut Stain Distressing Ink
- Cut 'n' Dry Foam
- Gold Embossing Powder
- Perfect Medium Ink Pad
- Heat Gun
- Archival Black Ink Pad
- Cosmic Shimmer Glitter Film in Aurora
- Iron
- Gold Glitter
- Aurora Glitter
- Acetate
- White Card
- Cream Card
- Black Card
- Brown Card
- Purple Cow Cutter
- 'Dries Clear' Glue and Metal Applicator
- 3D Foam Pads
- Parchment

INSTRUCTIONS

- 1) Fold a piece of A4 white card in half to make the base card.
- 2) Cut a piece of cream card about 1 inch smaller all around than the base card and colour around edges using Cut'n'Dry foam and Walnut Distress Ink.
- 3) Mat and layer this onto first brown, then black card.
- 4) Ink up the present stamp using Archival Black Ink, place two layers of Aurora Glitter Film on top followed by a piece of parchment, then rub a hot Iron over the top for approx 30 seconds. You will see the image come through when it is ready. Cut out and glue the present in the centre of the matted card.
- 5) Cut a strip of card approximately ½ inch thick and stamp and emboss 'Best Wishes' using Perfect Medium and Gold Embossing Powder. Shade top and bottom with Walnut Distress Ink and Cut'n'Dry foam. Glue this across the top left side of the prepared matted card and fold excess around the back and glue. Glue the background to the base card ready for the glittered bears.
- 6) Stamp 2 teddies onto acetate using Archival Black Ink and heat with gun to set. Cut out roughly and turn one teddy over so that the ink is on the underneath of one of the images. This is because you want to create a mirror image of the original.
- 7) Glue and glitter in gold the inside of the ears, the nose, the paws and the tummy of both teddies. Now, in a small empty container take a teaspoon of aurora glitter and mix into it a quarter of a teaspoon of gold then shake. Use this to glitter the remainder of each teddy. Set them to one side to dry for a couple of hours then cut out and turn over so that the glitter is on the underside of the acetate and the line detail is more visible. Position the teddies to each side of the Glitter Film present using 3D Foam.
