

# PartiCraft

## Project Sheet: Golden Leaves

### What you need:

- Unmounted Stamp Plate - Nature
- Brown 12 x 12 Card
- Cream A4 Card
- Black Card
- A4 Heat Proof Acetate
- Gold Embossing Powder
- Perfect Medium
- Walnut Distress Ink
- No.2 Round Brush
- Water
- Cut'n'Dry Foam
- Gold Brads
- 'Dries Clear' Glue and Metal Applicator
- Heat Tool

### INSTRUCTIONS

- 1) Start by making the main 'leafy' background image by stamping random leaves onto cream cardstock then colouring some by blending with a damp paintbrush, making some solid and leaving others as line art. Distress around the edges of the cream card using Cut'n'Dry Foam and Walnut Distress Ink.
- 2) Create the acetate overlay by stamping random leaves around the edge of an A4 piece of Heat Resistant Acetate using Perfect Medium and Gold Embossing Powder and heat to emboss. Attach this to the cream leafy background you just made using gold brads. Glue the whole thing to the right hand side of the brown 12 x 12 Card using dries clear glue.
- 3) Stamp the leaf border onto cream card and cut into a ½ inch strip to create a ribbon detail for the left hand side of the page. After distressing the edges and blending the leaves with a damp brush to darken them, stick this to the page as illustrated.
- 4) Mat and Layer your choice of main image onto brown then black card and position on top of the acetate overlay on the right hand side of the page. You can also use a smaller coloured version of your photo over the bottom right hand of the main photo to add some interest.
- 5) Create the gold leaf embellishments by stamping the same leaves you used for the background onto black card using Perfect Medium and Gold Embossing Powder and heating to emboss. Cut these out and group together, sticking them down the left hand side of the page over the leaf ribbon detail and over the main photo.
